Markup supports **bold**, *italic*, and **even *mixed* *markup***.

And now also color and underline. You can alternate the position and thickness, so you may also use this to ~~strike through~~ or blacken ████ out

Escape * with * and _ with _ in markup.

Also, you can do all that indentation stuff much easier with markup, e.g. simple indentation
    At vero eos et accusam

And end the indentation. Now a list:
- This is a list item
- Another list item
  - » A sub list item
- And yet another one

Even enumeration is supported:
1. This is a list item
2. Another list item
   a) A sub list item
3. And yet another one

And you can customize it:
 I -> This is a list item
II -> Another list item
        a ~ A sub list item
III -> And yet another one
